EXAMINER'S AMENDMENT

The following is an examiner's statement of reasons for allowance: the prior art of record teaches a display utilizing cholesterin liquid crystal polymer for enhancing contrast, the display comprising a transparent substrate and a transparent bus-bar overlaid on the substrate, an electric hole conductive layer being overlaid on the bus-bar, an electronic conductive layer being overlaid on the lighting layer, a cathode electrode layer being overlaid on the electronic conductive layer, an insulating packaging layer being disposed on the cathode electrode layer, the electric hole conductive layer being painted with polymer electric hole conductive material and coordinated on the bus-bar, and a circular polarizing optical coating being attached to one face of the substrate. The prior art of record does not teach nor suggest, in combination with the above limitations, at least one lighting layer being overlaid on the electric hole conductive layer, the lighting layer having cholesterin liquid crystal phase and being made on the coordinated electric hole conductive layer, the lighting layer going through backfire to be arranged into such a structure that the cholesterin liquid crystal lighting molecules can induce and emit manual circular polarized light.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
